

Educational games for primary and post-primary pupils

Interactive educational resources for primary and post-primary schools are now available on [logainm.ie](http://www.logainm.ie) at <http://www.logainm.ie/Cluichi/>. These educational resources are targeted at pupils at senior level in primary school and at transition year pupils at post-primary level, but they may be used at other levels also.

The resources are being provided as a tool for teachers and pupils. Placenames are a central part of Irish heritage. We hope that these resources will enhance the experience of teaching and learning Irish as a pleasurable activity.

The content for these resources was developed by Fiontar (DCU), in collaboration with the Placenames Branch (Department of Arts, Heritage and the Gaeltacht). *Modello Design Ltd.* developed the interactive features. *An Chomhairle um Oideachas Gaeltachta agus Gaelscolaíochta* (COGG) funded the development of the interactive educational resources.

The following resources are available: crosswords, word searches, matching games, *drag and drop* games. The resources are in Irish and are based on the static educational resources already available at <http://www.logainm.ie/scoil/?uiLang=en>.

www.logainm.ie is a public Web site which provides the official Irish-language versions of approximately 100,000 places throughout the country. The placenames Web site has attracted 5.9 million hits since its official launch on 1st October 2008.
